Summary

Senior UX/UI Designer with 5+ years of experience designing B2B and B2C SaaS products in healthcare and mental health. Owns end-to-end product areas, with a strong focus on workflow and system design, usability, and operational efficiency. Proven track record of reducing service delays, improving adoption, and driving measurable product impact through data-informed design decisions.

Work Experience

BestDoc Technology | Senior UX/UI Designer

Jul 2023 - Present | 📍 Kochi & Bangalore (Remote)

- Own end-to-end product design for **BestDoc Concierge** and **BestDoc Survey**, healthcare SaaS products focused on **patient experience, operational workflows, and service management**.
- Redesigned Concierge workflows by mapping real user journeys and removing coordination bottlenecks, reducing service delays by ~40%.
- Designed patient-driven self-service flows across QR codes, WhatsApp, web, and mobile, reducing nursing and support staff workload by ~30%.
- Simplified task routing and status visibility to create a single source of truth for request ownership and completion.
- Designed BestDoc Survey with short, contextual surveys for low-attention, mixed-literacy users, enabling faster feedback capture and actionability.
- Partnered with PMs, engineers, and customer success teams to define scope, success metrics, and phased rollouts for core features.

HappilyEver.co | UI/UX Designer

Sep 2021 - Jul 2023 | 📍 California & Hyderabad (Remote)

- Led end-to-end UI/UX design for a **mental healthcare platform** supporting both B2B and B2C models.
- Designed the onboarding flow and profile listing for mental health professionals, reducing drop-off rates by 25% during registration.
- Developed a chatbot module for automated session booking, assessments, and mental health tracking, leading to a 40% increase in bookings.
- Created intuitive dashboards for professionals to manage sessions, access client history, and reports, enhancing therapist efficiency by 35%.
- Designed and built the platform's official website, enhancing brand presence and improving user accessibility.

Skills

Problem Framing
Product Thinking
Workflow Design
Design Systems
Research Synthesis
Prototyping
Interaction Design
Usability Testing
SaaS Complexity
Accessibility (WCAG 2.2)

Tools
